REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to methods of reducing pitting in preparation of nucleic acid arrays by drying the arrays. This invention draws on two disparate technologies, silicon chip manufacturing and nucleic acid array synthesis. While pitting was a recognized problem in silicon chip manufacturing, pitting was not recognized as a problem in nucleic acid array synthesis. In fact, given the teachings that desired maximal coverage of surfaces in the DNA array art, the art might arguably teach away and desire pitting to increase the surface area and increase the density of the nucleic acids on the array. Therefore, there is no motivation to combine these two concepts and the cited prior art does not discuss the reduction of pitting in any way. Therefore, the claims are novel and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
